Profile

3rd-year Engineering Student in **Data Engineering** at ENET'Com, holding a Bachelor's degree in Business Information Systems with a dual degree from Le Mans University. Passionate about **Data, AI, and Web Development**, I am seeking a final year internship to enhance my technical skills within an innovative environment.

Academic Projects & Achievements

DocuMind – RAG Assistant for Technical Documentation

Ongoing

- Developed a RAG assistant to query technical documentation and provide source-backed answers.
- Designed the pipeline: ingestion, embeddings, vector search, and LLM generation; evaluated using RAGAS and tracked via MLflow.
- Set up version control, CI/CD, FastAPI backend, and containerization with Docker.

Technologies: Python, RAG, LLMs, ChromaDB, FastAPI, Docker, RAGAS, MLflow, DVC, DagsHub.

Summer Internship – Retail Intelligence Platform

June 2026 / Anavid, Sfax

- Developed a Retail Intelligence platform dedicated to processing and analyzing customer and transactional data.
- Implemented Batch and Streaming pipelines with Apache Kafka and Apache Spark, incorporating data processing and feature engineering for training classification, regression, and clustering models.
- Automated and orchestrated workflows using n8n.
- Developed Grafana dashboards to track KPIs and integrated visualizations into the platform interface.
- Implemented MLOps practices: tracking and versioning models and data with MLflow and DagsHub, exposure via FastAPI, and automating CI/CD workflows using GitHub Actions.
- Developed a RAG/Chatbot solution for intelligent data exploitation.

Technologies: Python, Spark, Kafka, PostgreSQL, Grafana, n8n, Scikit-learn, MLflow, DagsHub, GitHub Actions, FastAPI, Ionic, React.

Final Year Project – Autism Detection using Graph Neural Networks

Feb. 2026 – Apr. 2026

- Applied the **GAT-LI** model to the **ABIDE I** dataset for autism classification.
- Preprocessed and analyzed neuroimaging data.
- Evaluated model performance.
- Developed a NeuroScan platform with Flask for automated fMRI file analysis and classification result visualization.

Technologies: Python, PyTorch, Scikit-learn, NumPy, Flask.

Final Internship – CMMS Platform

Jan. 2024 – June 2024 / Advantrix X, Sfax

- Designed and developed a Computerized Maintenance Management System (CMMS) web platform.
- **Technologies:** Native PHP, HTML, JavaScript, CSS, Ajax, jQuery, JSON

Professional Experience

Full-Stack Web Developer – Advantrix X

June 2024 – Oct. 2024 / Sfax

- Maintained and evolved a production tracking web platform and developed new features.
- Provided technical support and user assistance.
- **Technologies:** Native PHP, HTML, CSS, JavaScript, jQuery, Ajax, JSON.

Education

2024 – Present: Engineering Degree – Data Engineering and Decision Support Systems (IDSD) – ENET'Com, Sfax

2021 – 2024: Bachelor's Degree in Business Information Systems – FSEGS, Sfax / Dual Degree in Computer Science – Le Mans University (France)

Technical Skills

Big Data & Streaming: Apache Spark, Apache Kafka

MLOps & Monitoring: MLflow, DagsHub, GitHub Actions, Grafana, n8n

Programming Languages: Java, Python, Scala, C, JavaScript, PHP, C#, Dart, PL/SQL

Frameworks: Spring Boot, FastAPI, React, Express.js, Symfony, Laravel, Flutter, Ionic

Databases: PostgreSQL, MySQL, MongoDB

Tools & Environments: GitHub, Linux, VS Code, IntelliJ IDEA, Visual Studio, Jupyter Notebook, Android Studio, Node.js

Languages

Arabic: Native **French:** Professional Proficiency **English:** Intermediate

Community Involvement & Interests

Microsoft Tech Club FSEGS: Member, participated in technology and professional development initiatives.

Interests: Artificial Intelligence, Data Science, Machine Learning, Deep Learning, Digital Transformation, Industry 4.0.
